

5

reasons to choose docSAFE for GDPR compliance

GDPR is a challenge that every UK business will face in the coming months. Despite Brexit, we are still subject to the rules and guidelines set out in the new, stringent data protection act that comes into effect by May 2018. It affects every business that holds information on its customers, staff, suppliers. And if you are in breach? You face fines of up to 4% of turnover or up to £17.25million. Read our blog at www.docsafe.co.uk for more information.

1

Secure

With many layers of security, your data, and your clients' data is secure which is the main reason for the new GDPR regulations. We offer 2-factor authentication, QR codes and much more.

Compliant

We have built our systems to be fully compliant and with a full audit trail of activity.

2

3

Servers on the doorstep

Not everyone knows where their data is stored. We hold data within the EU, subject to EU laws and guidelines - just like GDPR.

Reduces risk

docSAFE is a secure client portal, eliminating the need for email and other ways a breach could occur.
